Backtracking on his previous threat to block the bipartisan bill, Trump allowed millions of Americans to continue receiving unemployment benefits and avoided a federal government shutdown. Nasdaq futures also rose 0.7 percent and were close to all-time levels. Lebanon has secured about 2 million doses of Pfizer-BioNTech's COVID-19 vaccine, which will cover 20 percent of the country's citizens, the health minister said Monday. Hamad Hassan told Reuters two weeks ago that the country was about to sign a supply agreement and that the first batch would arrive eight weeks later. Lebanese hospitals are under pressure as infections increase. 2020 marks the highest year of revenue in the company's history, exceed shipping milestone of 50 Million RFAUSTIN Filters, Texas, December 28, 2020 (GLOBE NEWSWIRE) -- Resonant Inc. Caro Caro it was an important operational and financial year for Resonant, also in light of the widespread effects of the COVID-19 pandemic. Let us hope that all of you have remained safe and sound in these difficult times. Now more than ever, we've seen the trend toward a more connected world, bringing the need for effective RF filtering technologies to the forefront and center for many industry players. This trend is driven by the insatiable demand for data on mobile devices for streaming, as well as the need for speed from other emerging applications, such as autonomous vehicles that rely on incredibly fast communication to perceive other objects and avoid collisions. With this appetite for data and speed came the need for wide bandwidth, high-frequency RF filters, which is the fundamental advantage of what our ISN® technology can provide not only 4G RF filters, but also for next-generation RF 5G, Wi-Fi and Wi-Fi 6E filters. As far as we know, Resonant remains the only company in the world that can provide RF filter solutions that, by design, natively meet the increasingly complex RF performance requirements for mobile and non-mobile applications, without the need for doping or accessory components. In most cases, we can also reduce design time and help our customers benefit from the use of more cost-effective manufacturing processes. Put simply, our ISN technology platform and XBAR ® have positioned us to benefit greatly from the fast-growing 5G mobile phone market. To date, our customers have cumulatively shipped over 50 million RF filters designed using our technology, many of which continue to reach Tier-1 smartphones, as well as Wi-Fi and the automotive market. 2020 will mark the highest year of revenue generation in the company's history and one in which we have achieved a number of other significant milestones. By the time we entered 2020, we had recently signed a partnership with the world's largest RF filter manufacturer, which consisted of a strategic investment and licensing agreement to design 5G RF filters with our XBAR technology®. Filter Market duplexer market Murata38% Murata35% Qualcomm25% Broadcom20% Wiso11% Qualcomm12% Broadcom7% Skyworks11% Qorvo6% Taiyo Yuden10% Skyworks6% Qorvo6% Taiyo Yuden6% Wiso5% Other1% Other major RF and Duplexer filter manufacturers (Source: Navian, 2019)Work with this partner started quickly and in October 2020 we successfully reached our second goal ahead of schedule, which required us to achieve target performance , initial packaging and reliability previously determined. In conjunction with this milestone, we received a payment of \$2.5 million and most importantly, moved on to the next phase of the agreement that focuses on building a commercial platform and high-volume production of our RF XBAR® 5G filters. Our strategic partner has exclusivity with our XBAR technology® for mobile applications until March 2022 and with two of the four milestones already reached, reached, remain extremely optimistic about our strategic partnership. We also continue to make significant progress with our RF 4G filter solutions with our standard product library that we are leveraging with customers around the world. Taking advantage of this solution, we signed a multi-year licensing agreement with a dominant Asian filter foundry partner, which includes both prepaid revenue and royalties. As we enter 2021, we will have completed projects for a total of seven 4G RF filter projects covering multiple bands, collectively representing an achievable global market of about \$1.6 billion. Through internal work and conversations with current and potential partners, we have become increasingly aware that our XBAR® technology is also ideal for high-frequency 5- and 6GHz Wi-Fi applications, such as Wi-Fi 6E, a fast-growing market segment that represents a massive opportunity. To give you an idea of the scale, according to CISCO, Wi-Fi 6 hotspots will grow 13 times from 2020 to 2023. Wi-Fi 6E has 1,200 MHz of spectrum available now, about 4 times the size of the C block spectrum, which is currently auctioned and exceeds expectations nearly \$70 billion in revenue. Clearly, this market is exploding and will require efficient RF filter solutions in the Wi-Fi market for mobile, CPE, and infrastructure applications. Where we are today, we have the potential to ship our first Wi-Fi 6E champions in the first half of 2021. Our progress has allowed Resonant to recruit what we believe to be the industry's leading advisory board, consisting of Jeff Ball, Clint Brown, Brian Crutcher, Rubén Caballero, Peter Gammel, Josh Jacobs, Luis Pineda and Glen Riley. Collectively, they bring significant industry experience spanning over 150 years with companies such as, Apple, Broadcom, JP Morgan, Microsoft, Skyworks, Qorvo, Qualcomm, Texas Instruments, and Yahoo!. Their extraordinary experiences have contributed to our winning strategy. As we move through 2021: * We expect significant growth in unit volumes, provide continuous validation of our ISN® and IP platforms * We will expand our relationship with the world's largest RF filter manufacturer, as we work with them to build a high-volume manufacturing platform for XBAR® filters that meet the demanding demands of the world's largest mobile phone OEMs * We plan to secure a contract in the first half of the year focused on non-mobile applications, which could include autonomous and electric vehicles, other IoT, CPE or infrastructure applications For our stakeholders, thank you for your continued support. Although we have done a lot this year, there is a lot of work to be done to address the urgent challenges facing our industry. Looking at the and beyond, our momentum will continue to build. Our proprietary ISN® EDA software tool has allowed us to build a strong IP portfolio of over 300 patents filed or issued, with over 150 focused on 5G, 5G technology. From a strong cash position, we expect our revenues to continue to grow and annual volumes to accelerate at the pace we saw in 2020, all while ensuring new customers and contracts focused on mobile and non-mobile opportunities. Together, we are in a stronger position than ever to promote long-term value to our shareholders. Resonant (NASDAQ: RESN) is transforming the RF front-end market (RFFE) by disrupting the RFFE supply chain by providing solutions that leverage our Infinite Synthesized Network (ISN) software tools platform, capitalize on the breadth of our IP portfolio, and are provided through our service offerings. In a market strongly constrained by limited designers, tools, and capabilities, Resonant addresses these critical issues by providing customers with increasing design efficiency, reduced production time on the market, and lower unit costs. Customers leverage Resonant's disruptive capabilities to design state-of-the-art filters and modules, while capitalizing on the added stability of a diversified supply chain through Resonant's flawless ecosystem, the first of its kind. Working with Resonant, customers improve the connectivity of today's mobile devices while preparing for the needs of emerging 5G applications. To learn more about Resonant, watch the series of videos posted on its website explaining Resonant's technologies and market positioning: * Resonant Corporate Video * ISN and XBAR: Speeding the Transition to 5G * Expert Insights on Unlocking the Potential of 5G * The Technology Enabling the Transition to 5GFor more information, visit www.resonant.com. Resonant uses its Website and LinkedIn page as channels for distributing information about its products, its planned financial and other announcements, its participation in upcoming investor and industry conferences, and other matters. Such information may be considered material information and Resonant may use such channels to fulfill its disclosure obligations under the FD Regulation. Therefore, investors should monitor the company's website and social media accounts as well as follow the company's press releases, SEC documents, public conference calls, and webcasts. About Resonant's ISN® TechnologyResonant can create projects for bands, modules, and other complex FRONT End RF requirements that we believe have the potential to be produced at lower cost and less time than traditional approaches. ISN is a suite of proprietary mathematical methods, software design tools, and network synthesis techniques that allow us to explore a much larger set of possible design solutions that regularly incorporate our technology We then quickly provide design simulations to our customers, who produce or have produced from one of our foundry partners. These improved solutions still use Surface Acoustic Wave (SAW) or Temperature Compensated Surface Wave production methods (TC-SAW) and performance, as well as those that use higher-cost production methods such as Bulk Acoustic Wave (BAW). Resonant's method offers excellent predictability, allowing you to achieve the desired product performance in about half of the curves through the fab. In addition, since Resonant models are fundamental, integration with the foundry and fabulous customers is seamless because its models speak the fabulous language of the properties and sizes of the basic materials. Safe Harbor / Forward-Looking StatementsThis press release contains forward-looking statements, which include, among others, the following topics: future shipments of RF filters designed using our technologies, the capabilities of our software filter and tool designs, the expanding use of RF filters in emerging markets, and our customers' target applications for our technology. Forward-looking statements are made as of the date of this document and are inherently subject to risks and uncertainties that may cause actual results to differ materially from those of forward-looking statements, including, but not limited to, the following: our limited operating history; our ability to complete projects that meet customer specifications; the ability of our customers (or their manufacturers) to manufacture our projects in commercial quantities; the ability of our customers to sell products that incorporate our designs to their OEM customers; changes in our expenses and other uses of cash; the ability of our projects to significantly reduce costs compared to other projects and solutions; the risk that intense competition and rapid technological change in our sector will make our projects less useful or obsolete; our ability to find, recruit and retain the highly qualified personnel needed for our design process in sufficient numbers to support our growth; our ability to manage growth; general market, economic and commercial conditions. Additional factors that may cause actual results to differ materially from those foreseen in our forward-looking statements are under the caption Risk Factors and Discussion and Analysis of The Management of Financial Conditions and Results of Operations in our latest annual report (Form 10-K) or quarterly report (Form 10-Q) filed with the Securities and Exchange Commission. Forward-looking statements are made as of the date of this press release and we expressly disclaim any obligation or commitment to update forward-looking statements. Investor Relations Contact: Greg Falesnik or Brooks Hamilton MZ Group - MZ North America (949) 546-6326 RESN@mzgroup.us British Columbia, December 28, 2020 (GLOBE NEWSWIRE) -- ElectraMeccanica Vehicles Corp. (NASDAQ: SOLO) [ElectraMeccanica or the Company], an electric vehicle designer and manufacturer, today provided an update on the opening of six (6) new retail locations last fall. In addition, the Company's management has published a state-of-the-art on the site look for a technical assistance and engineering facility based in the United States. ElectraMeccanica also announces an early-adopter test drive program called SOLO Drive Tour as part of the expansion of its ongoing integrated marketing campaign. Since October ElectraMeccanica has opened six (6) new retail locations in: San Diego, CA; Brea, CA; Scottsdale, AZ; Glendale, AZ; Santa Clara, CA and Walnut Creek, CA. All retail showcases are fully operational and have expanded the Company's existing footprint from four (4) to 10 locations in five (5) key markets with further announcements expected in 2021. We have been encouraged by the success of our ongoing retail awareness campaign and the extremely positive response from consumers, especially in our new locations, Rivera said. The strong initial performance we are seeing speaks of a broader market availability for SOLO as a solution that addresses urban driving challenges. As we emerge from the pandemic, we believe SOLO is uniquely positioned to provide owners with a safe, reliable and fully autonomous transportation alternative. The Company is also providing a status report regarding its decision for a U.S. assembly facility and the headquarters of the engineering technical center. Rivera added: As for our site selection decision for an assembly plant, representatives from the two finalist locations in Tennessee and Arizona were overwhelming in their enthusiasm for this project. Rivera added. Their detailed plans to develop the SOLO ecosystem have presented us with interesting opportunities that we continue to evaluate with the latest updated proposals received as recently as last week. One of the key considerations in making this decision is to ensure feasibility and support for our overall vision of a SOLO ecosystem and pilot test program. Our final selection will mean a long-term commitment on both sides. We look forward to making a formal announcement early in the new year and appreciate the patience and consideration of all stakeholders as we work to do so. As previously announced, the Company has introduced new extended and multi-channel marketing initiatives aimed at raising awareness of the ElectraMeccanica brand and the EV ONLY. As part of a broader campaign to be introduced in the first quarter of 2021, the company will debut its exclusive SOLO Drive Tour Invitation-only events in selected markets will include custom test drives for early booking holders to give these early customers the opportunity to watch, see, and Drive SOLO. These demonstrations, which will be conducted in accordance with all local COVID-19 security protocols, will be hosted in new and existing retail outlets, including a planned startup event for Scottsdale, AZ in January followed by events in California and other locations later in the quarter subject to local and state government orders. THE SOLO is a all-electric three-wheeled solution for the urban environment. Designed for a single occupant, it offers a unique driving experience for the environmentally friendly consumer. THE SOLO has a range of 100 miles and a top speed of 80 mph, making it safe for highways. The SOLO is equipped with front and rear crumpling zones, side impact protection, roll bar, torque throttling control, as well as power steering, power brakes, air conditioning and a Bluetooth entertainment system. Combine a modern look with security features at an affordable price of \$18,500. SOLO is currently available for pre-orders at: ElectraMeccanica Vehicles Corp. (NASDAQ: SOLO) is a Canadian designer and manufacturer of environmentally efficient electric vehicles (VEHICLES). The company's flagship vehicle is the innovative purpose-built single-seater EV called SOLO. This three-wheeled vehicle will revolutionize the urban driving experience, including commuting, delivery, and shared mobility. SOLO offers a unique, trendy, fun, economical and environmentally friendly driving experience. InterMeccanica, a subsidiary of ElectraMeccanica, has been successfully building high-end special cars for 61 years. Investor Relations, please contact:Gabe RodriguezPhone: (623) 261-9046Ee electronic mail: relationsgroup@gmail.comSeagate Technology plc (NASDAQ: STX), world leader in data storage and management solutions, today announced that Pratik Prat Bhatt has been appointed to the Board of Administration of the company and to serve The Board's Audit and Finance Committee, as of December 24, 2020.Recent wide-ranging attacks provide further confirmation of Safe-T's business and product strategy over the past year , to take a proactive approach to identify potential threats and develop advance products for preventing and containment of HERZLIYA attacks. Israel, December 28, 2020 (GLOBE NEWSWIRE) -- Safe-T® Group Ltd. (NASDAQ, TASE: SFET), a provider of secure access solutions for on-premises and hybrid cloud environments, today announced that in the face of recent supply chain attacks, such as the Sunburst (or Solarigate) attack, it offers a free review of organization networks and attack footprint. Safe-T's ZoneZero™ ZoneZero (MFA) solution is designed to add the main component of a strong identity and access management policy to any enterprise resource and secure organizations against supply chain attacks, including recent attacks. Recently, it has been reported that a it has managed to infiltrate a large number of organizations, including several U.S. government agencies. It did this by deploying backdoor software, called SunBurst, using a weak link in SolarWinds' Orion IT monitoring and management software update system and then entered malicious code into otherwise legitimate legitimate code updates. Once the backdoor access was obtained, the attackers worked to escalate privileges, steal credentials, and then sideways traverse the internal network scan to search for targeted data. Based on SolarWind data, 33,000 organizations use orion software and 18,000 had been directly affected by this malicious update. As more details become available, it has become clear that this is one of the most invasive and significant cyberattacks to date. Safe-T ZoneZero™ multi-factor authentication is the first Zero Trust Network Access (ZTNA) solution designed to add centralized multi-factor authentication to any enterprise resource, including your system, servers, data, applications, and more. For clients that use the solution, when an attempt is made to access a server from an infected system, it invokes a multi-factor authentication request that, until approved, prevents unauthorized source from infiltrating. Recent wide-ranging cyberattacks confirm Safe-T's business and product strategy over the past year. We are taking a proactive approach to identify potential threats and develop advanced products designed to prevent and contain such attacks. Our ZoneZero™ MFA solution, launched earlier this year, is a great example of our alignment against new types of cyber threats, said Shachar Daniel, CEO of Safe-T. Our centralized approach assumes that the attacker is already in the network and prevents the spread of the attack from moving sideways across the network. By deploying ZoneZero™ MFA to the network, you can now ensure that any user or application request to any internal application invokes an MFA action, blocking hackers or third-party attacks from moving over the network. Our solution allows customers to easily integrate multi-factor authentication and identity awareness into all access scenarios: remote and internal users, VPNs, web, and non-web applications. SolarWinds is used by thousands of companies, government agencies and NGOs. While any breach of our customers' systems remains confidential, we believe that using our ZoneZero™ MFA could successfully prevent hackers from traversing from the infected SolarWinds solution to other network resources, thus cutting off the main attack vector. Stopping the infiltration of a cyberattack ensures that our customers are protected from the most dangerous part of the attack and are well positioned to survive future supply chain incidents. We encourage organizations that rely on traditional security measures to consider our solution to protect their network. This was one of the largest security attacks in history, we know it won't be the last, concluded Daniel.To learn more about ZoneZero™ MFA and the SolarWinds attack, read our blog post here. About Safe-TSafe-T Group Ltd. (Nasdaq, TASE: SFET) is a provider of access solutions that limit attacks on business-critical services and sensitive business data while ensuring uninterrupted business continuity. Safe-T's cloud and on-premises solutions ensure Cases of an organization's use of access, both in the organization and from the organization to the Internet, are protected according to the validation philosophy before, subsequent access of zero trusts. This means that no one is trusted by default from inside or outside the network, and verification is required from anyone attempting to access resources on the network or in the cloud. Safe-T's wide range of access solutions reduces the attack surface of organizations and improves their ability to defend against modern cyber

threats. As an additional layer of security, our integrated cloud service of enterprise-class global proxy solutions enables smooth and efficient traffic flow, seamless service, unlimited concurrent connections, instant scalability, and simple integration with our services. With Safe-T's patented reverse access technology and proprietary routing technology, organizations of all types and sizes can protect their data, services, and networks from internal and external threats. At Safe-T, we enable businesses to safely migrate to the cloud and enable digital transformation. For more information about Safe-T, visit www.safe-t.com. Forward-Looking Statements This press release contains forward-looking statements within the meaning of the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. Words such as expecting, anticipating, intending, planning, believing, searching, estimates and similar variations of such words are intended to identify forward-looking statements. For example, Safe-T uses forward-looking statements in this press release when discussing the benefits of its ZoneZero™ MFA solution, such as successfully preventing hackers from traversing from the infected SolarWinds solution to other network resources. As these statements deal with future events and are based on Safe-T's current expectations, they are subject to various risks and uncertainties, and Safe-T's actual results, performance or results may differ materially from those described or implied in the statements in this press release. Forward-looking statements contained or implied in this press release are subject to other risks and uncertainties, including those discussed under Safe-T's annual report on Form 20-F filed with the Securities and Exchange Commission (SEC) on March 31, 2020 and in any subsequent filings with the SEC to reflect the occurrence of unforeseen events. Kennedy International Airport (JFK), Boston Logan International Airport (BOS) and Phoenix Sky Harbor Airport (PHX). Starting today, its subsidiary, XpresCheck, will begin serving as a trusted test partner for carrier guests traveling on its non-stop flights to Hawaii. We are very pleased to be welcomed as a trusted partner of Hawaiian Airlines and Hawaiian state so that more travelers can safely return to vacation during the COVID-19 pandemic. Our growing network of airline partners is providing more travelers with more access to more destinations by 2021, said Doug Satzman, XpresCheck, Chief Executive Officer of the XpresSpa Group, will provide on-site pre-trip testing with rapid molecular testing services -- with results provided on hold -- so travelers can bypass the status of Hawaii's 10-day quarantine restriction. Guests can access the walk-up test site and purchase a \$200 state-approved quick test at the following airport locations: *JFK: Terminal 4 *BOS: Terminal E*PHX: Terminal 4 passengers who tested positive for a quick test are informed that they need to exit the airport and self-isolate according to CDC guidelines. Any travel companions will also not be allowed to travel. As multiple destinations impose test requirements, partnerships between airport testing facilities and airlines will continue to pave the way for the restoration of traveler trust and safety in 2021. Our partnership with XpresCheck continues our commitment to making pre-trip testing seamless and accessible for our guests returning home or taking a long-awaited Hawaiian vacation from Phoenix, New York City and Boston, while also doing our part to keep Hawai'i track records as a safe destination, said Avi Mannis, senior vice president of marketing at Hawaiian Airlines. Passengers should visit www.XpresCheck.com/hawaiianairlines to make appointments. Speaking of Hawaiian Airlines Hawaiian® has driven all U.S. carriers in on-time performance for each of the last 16 years (2004-2019) as reported by the U.S. Department of Transportation. Consumer surveys Condé Nast Traveler, Travel + Leisure and TripAdvisor have placed Hawaiian among the best of all national airlines serving Hawaii. Now, in its 92nd year of continuous service, Hawaiian is hawaii's largest and longest-running airline. In 2019, Hawaiian offered non-stop flights between Hawaii and other U.S. gateways (13) compared to any other airline, together with the service connecting the islands with Japan, South Korea, Australia, New Zealand, American Samoa and Tahiti. As a result of the COVID-19 pandemic, hawaiiian offers an adequate schedule of daily flights within the Hawaiian Islands and between Hawaii and the U.S. mainland, as well as Japan and Korea. La airline is committed to the health and safety of its guests and employees and has strengthened improved cleaning procedures throughout its business. While the experience can be a bit different, authentic Hawaiian hospitality remains unchanged. More details about how Hawaiian is keeping guests safe and employees are available at HawaiianAirlines.com/KeepingYouSafe. Hawaiian Airlines, Inc. Further information is available at HawaiianAirlines.com. Follow Hawaiian Twitter (@HawaiianAir) updates, become a fan on Facebook (Hawaiian Airlines) and follow us on Instagram (Hawaiian). For posts and career updates, follow the Hawaiian's LinkedIn page. XpresSpa Group, Inc. XpresSpa, the main asset of the XpresSpa Group, is a leading airport retailer of spa services and related health and wellness products, with 50 locations at 25 airports globally. Through its subsidiary XpresTest, Inc., the Company also provides COVID-19 screening and testing under its XpresCheck brand™ JFK International Airport, Newark Liberty International Airport, Logan International Airport, Sky Harbor International Airport, and Denver International Airport. For more information about XpresSpa Group, visit: www.XpresSpaGroup.com. For more information about XpresSpa, visit www.XpresSpa.com. For more information about XpresCheck, visit www.XpresCheck.com. Forward-Looking Statements Forward-Looking Statements This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These include statements preceded by, followed by, or otherwise include words believes, expects, anticipates, estimates, projects, intends, should, seeks, future, continues, or the negative of such terms, or other comparable terminology. In particular, these statements include, but are not limited to, statements about our expectations regarding our new XpresCheck™, being able to expand testing to other communicable diseases and administer seasonal flu vaccinations, our positioning to be part of the national implementation of various COVID-19 vaccinations as they become available, the degree to which our public test model assists passengers to meet test requirements in selected states and countries, our ability to identify and gain access to the most and improved COVID-19 testing methodologies and equipment and our ability to further expand our initial sites and our overall ability to regulatory challenges associated with this line of business. Forward-looking statements regarding expectations of future results or events are based on the information available to the XpresSpa Group as of today and are no guarantee of the company's future performance, and actual results may vary greatly from the results and expectations discussed. Further information about these and other risks can be found in the latest annual report filed by the XpresSpa Group on Form 10-K, in the quarterly report on Form 10-Q, in the recent updated reports on Form 8-K, and in other Securities and Exchange Commission filings. All subsequent forward-looking written and oral statements regarding the XpresSpa Group, or other matters and attributable to the XpresSpa Group or any person acting on its behalf are expressly qualified in their entirety by the above cautionary statements. XpresSpa Group undertakes no obligation to publicly update any of these forward-looking statements to reflect events or circumstances that may arise after the date of this document. Media - XpresSpa Julie Ferguson Julie@jfrmedia.com (312) 385-0098 Reporting - XpresSpa ICR Raphael Gross ir@xprespagroup.com (203) 682-8253 Media - Hawaiian Airlines Hawaiian Airlines Public Relations news@hawaiianair.com Limoneira Company (the Company or Limoneira) (Nasdaq: LMNR), a diversified citrus growth, packaging, sales and marketing companies with related agr-food activities and real estate development operations, today announced that it will release financial results for the fourth quarter and the entire fiscal year that ended on October 31, 2020, Monday, January 11, 2021, after the market closes. Continue to generate enthusiasm for award-winning cybersecurity solutions; Enter fiscal 2021 with Record New Business Pipeline and Solid Cash Position LOWELL, Mass., December 28, 2020 (GLOBE NEWSWIRE) -- CSP Inc. Key fourth quarter results * Gross margin improved by 8 percentage points from the fourth fiscal quarter a year ago, as higher margin offerings gain market acceptance * The practice of managed services remains strong as new and existing customers continue to generate significant momentum * Fiscal year 2020 ended with a solid cash balance to fund growth targets Our fiscal fourth quarter financial performance, as well as the entire fiscal year, was influenced by the difficult business environment created by the COVID-19 pandemic. While the challenges remain, we have made numerous adjustments to our operations and made progress positioning CSPi for more results in 2021 and beyond, commented Victor Chief Official. The expansion of our gross margin by 8 percentage points is encouraging and demonstrates our commitment to building our profitability. In addition, we have managed our money prudently throughout the year and, despite the unprecedented landscape, we have sufficient resources to navigate short-term uncertainty to grow and thrive. For example, we are generating a strong momentum in our practice on managed services, including our UCaaS offering. We are pursuing a number of larger transactions with this offer that could contribute well to fiscal 2021 and promote greater margin improvement. Our fiscal 2021 looks promising and I believe growth drivers in the coming year, including ARIA and a full recovery in our cruise line business, will allow us to significantly exceed the revenues, gross margin and profit results we reported in fiscal 2020. Fourth quarter 2020 revenue results for the fiscal fourth quarter were \$14.3 million, compared with \$22.2 million in the fiscal fourth quarter a year ago. Gross profit for the fourth fiscal quarter was \$4.4 million, or 31% of sales, compared to \$5.1 million, or 23% of sales, in the fourth fiscal quarter a year ago, reflecting a better gross profit percentage plus a higher margin services mix and product activity. The Company reported a net profit of \$36,000 for the fourth fiscal quarter, or \$0.01 per share, compared to a net loss of \$US\$334,000 or \$(0.08) per share, for the fourth quarter of fiscal 2019. The loss before income tax was \$(689,000) for the fourth fiscal quarter, compared to net income before income tax of \$61,000 for the same quarter of the previous fiscal year. The benefit of the company's income tax for the fourth fiscal quarter was \$725,000. The tax benefit is due to a partial deduction of valuation versus U.S. deferred tax assets that are more likely to be partially realized, offset by current year's federal research & development credits and the benefit of carrying back federal net operating losses. As of September 30, 2020, the Company had cash and cash equivalents of \$19.3 million. Full fiscal year 2020 Revenue results for the full fiscal year ended September 30, 2020 was \$61.8 million compared to revenues of \$79.1 million in the full period of the previous year. Gross profit for the twelve months ended September 30, 2020 was \$17.2 million, or 27.8% of sales, compared to \$18.0 million, or 22.8% of sales, in the twelve months ended September 30, 2019. The net loss for the full year closed at September 2020 was \$1.4 million, or \$0.36 per share, compared to net loss of \$(371,000) or \$(0.09) per share for fiscal 2019. Conference Call Details CSPi Chief Executive Officer Victor Dellovo and Chief Financial Officer Gary W. Levine will host a conference call at 10:00 a.m. (ET) today to review CSPi's financial results and provide a business update. To listen to a live webcast of the call, please visit the Investor Relations section of the Company's website at www.cspi.com, www.cspi.com. It can also listen to the call by phone, with the call 877-876-9173 or 785-424-1667 and using the conference ID: CSPQ420 when welcomed by the live operator. For interested parties who cannot participate in the live call, an archived version of the webcast will be available for about a year on the CSPi website. About CSPi CSPi (NASDAQ: CSPi) manages two divisions, each with a unique experience in designing and implementing technology solutions to help its customers use technology to succeed. The High Performance Product division, including ARIA Cybersecurity Solutions, originated from support initiatives for the Department of Defense and Western intelligence agencies related to network monitoring, data protection, and intelligence initiatives. This targeted mindset now translates into infallible data protection, at the enterprise level. Our set of defined security software air solutions provides increased network security and accelerated incident response capabilities, while our Myricom nVoy Series accessories provide automated breach identification and notification, enabled by the acquisition of 10G drop packets inherent in our Myricom smart cards. CSPi's Technology Solutions division helps customers achieve their business goals and accelerate time-to-market through innovative IT solutions and professional services by partnering with the best technology providers in their class. For organizations that want the benefits of cost-free IT, we offer a robust catalog of managed IT services that provides 24x365 proactive support. Our engineering team has experience in all major industries that support five key technology areas: Advanced Security; Communication and collaboration; Data Center; Networking; and Wireless & Mobility. Safe Harbor The Company wishes to take advantage of the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995 regarding statements that may be considered forward-looking under the Act. Such forward-looking statements may include, but are not limited to, numerous adjustments to our operations and have made some progress that positions CSPi for higher results in 2021 and beyond, pursuing a number of larger transactions with this offer that could contribute well to fiscal 2021 and drive higher margin improvement and fiscal year 2021 looks promising. The Company warns that a number of factors may cause actual results to differ materially from the Company's forward-looking statements. These risks include general economic conditions, market factors, competitive factors and price pressures and others described in the Company's deposits The Securities and Exchange Commission (SEC). Please refer to the section on forward-looking statements included in the Company's filings with the SEC. Levine CFO and Secretary gary.levine@cspi.com Direct : 978.954-5040 Foresight Autonomous Holdings Prices \$ 26 Milioni Registered Direct Offering Questo anno potrebbe scendere come il peggiore nella storia di ExxonMobil (NYSE: XOM). Grazie all'aumento dei prezzi del petrolio, il colosso petrolifero ha perso miliardi di dollari nel terzo trimestre e dovrebbe registrare una storica svalutazione che si avvicina ai 20 miliardi di dollari per il quarto trimestre. Exxon non è quindi riuscita ad aumentare il dividendo per la prima volta da decenni. Ecco tre azioni spesso trascurate che meritano un esame più approfondito: UMC (NYSE: UMC), Limelight Networks (NASDAQ: LLNW) e Glu Mobile (NASDAQ: GLUU). L'UMC, una fonderia di semiconduttori con sede a Taiwan, è spesso oscurata dalla sua rivale taiwanese Taiwan Semiconductor Manufacturing (NYSE: TSM). (Bloomberg) - Il petrolio è salito mentre il Regno Unito è pronto a concedere l'approvazione normativa a un altro vaccino Covid-19 e mentre gli Stati Uniti hanno approvato la legge sugli New York futures were trading up 1.2 percent after trading early. The UK's drug regulator delete the shot produced by AstraZeneca Plc and the University of Oxford for use as early as this week, according to a person with knowledge of the matter. This could give him another tool to fight the pandemic. Crude oil reversed losses as much as 1.5 percent after President Donald Trump signed the long-awaited \$900 billion virus relief bill, after previously criticizing the stimulus package. The bill's passage weakened the greenback, increasing demand for dollar-denominated commodities, and also raised hopes of higher oil consumption in the future. Despite Monday's gains, oil ends the year on a gloomy note. Traders are weighing up the short-term demand risk of increased travel restrictions due to a new coronavirus mutation, against optimism about vaccine implementations, which will eventually increase energy demand. There is also evidence that the resurrected pandemic is blocking economic recovery in parts of Asia. I see a very quiet market between now and the end of the year, but the direction for the next two days will be down due to the new strain of the virus, said Howie Lee, an economist at Oversea-Chinese Banking Corp. As it approaches the end of the year, traders are just happy to close their books. But some traders have an additional incentive to push up prices as the end of the year approaches, said Ole Sloth Hansen, head of commodity strategy at Saxo Bank A/S. Speculators have filled their boots with oil contracts since early November and with end of year just around the corner there is now a natural interest in defending those gains to block a good performance, he said. As OPEC+ prepares to meet next week, traders are looking for signs of a change in sentiment among its members on previously agreed cuts. The OPEC+ alliance plans to return 500,000 barrels per day of production to the market from January, but Algerian Energy Minister Abdelmadjid Attar's suggestion that the alliance should remain cautious in response to the coronavirus change offers slight price support, said Giovanni Staunovo, a commodities analyst at UBS. In the long run, Iran's plans to increase oil production in 2021 continue to weigh on the market and threaten to undermine OPEC+ efforts to increase production while avoiding flooding the market. Meanwhile, President Trump has raised geopolitical tensions in the region by accusing the Islamic Republic of being responsible for a missile attack near the U.S. Embassy in Baghdad, saying Iran has been dismissed as unfounded.
